

Flexible hand block

The solution for shaping

Flexible hand block – the solution for shaping

Sanding concave and convex shapes is even easier thanks to our newly developed flexible hand sanding block. The curvature of the surface can be precisely fine-adjusted using the adjusting wheel. This makes it considerably easier to sand concave and convex shapes.

This innovative product has been specially designed for sia Abrasives customers and has been filed for patent.

Advantages

- Adapts to surface contours
- Concave / convex shape is finely adjustable via an adjusting wheel
- Multi-hole air chamber backing provides full surface dust extraction and ensures a dust-free working environment
- For ergonomic manual work
- Suitable for standard, multi-hole and net-type abrasives
- Exclusively available from sia Abrasives

Application

- Sanding convex and concave contours on a variety of materials

Convex shape

Concave shape

Product	Dimension	Article ID
Flexible 41-hole hand block*	70 x 198 mm	0020.6695.01
Flexible 49-hole hand block*	115 x 230 mm	0020.6518.01
Flexible 68-hole hand block*	70 x 400 mm	0020.7045.01
Extraction hose	Ø 25 / Ø 21 x 4000 mm	0020.3925.01

* Comes complete with a control valve and an adapter.
