

2546 siabite

The high-performance disc with ceramic grit

2546 siabite – The high-performance disc with ceramic grit

Product profile

Grit type:	Ceramic aluminium oxide
Grit range:	60 – 240
Backing:	siafast cloth
Coating:	Closed
Bonding:	Resin over resin
Coating:	Active additive with cooling effect

A high-performance abrasive specially designed for high-alloy steel

Specially designed for high-alloy steel and other hard to grind metals, 2546 siabite consistently delivers maximum performance in applications from deburring to final sanding – thanks to features such as its high adaptability to contours, curves and profiles.

Advantages

- Highly adaptable to contours, curves and profiles
- High performance on hard to grind materials
- High removal rate thanks to ceramic grit
- Active additives with a cooling effect greatly reduce discolouration

Applications

- Removing discolouration
- Surface treatment
- Deburring
- Smoothing and blending of flaws
- Structuring and final sanding

Use

Random orbital sander

Materials

- High-alloy steel
- Steel
- Non-ferrous metals

Product	Size	Hole pattern
siafast discs	Ø 115 mm*	Without holes
	Ø 125 mm*	Without holes
	Ø 150 mm	Without holes
