

2803 siaron y

The top performer in the metalworking industry

The top performer in the metalworking industry

The special 2803 siaron y series is designed for high-alloy steels, it comes into its own in applications such as the industrial surface treatment of weld seams and transitions as well as the removal of mill scale – thanks to a combination of high stock removal rates, low surface pressure and extremely long life.

- ▶ Active additives with a cooling effect greatly reduce discolouration
- ▶ Excellent performance and lifetime
- ▶ Very high cut with low pressure

Product profile

Grit type:	Zirconia alumina
Grit range:	36-80; 120
Backing:	X-wt cloth
Coating:	Closed
Bonding:	Resin over resin
Special coating:	Cooling additive

Applications

- Weld preparation
- Removal of discolouration
- Stock removal
- Surface treatment
- Deburring
- Smoothing and blending of flaws

Materials

High-alloy steels

Use
