2970 siasphere

The high-tech solution for a perfect finish

The high-tech solution for a perfect finish
The special siasphere series allows metal surfaces to be treated more efficiently and cost-effectively. 2970 siasphere is the more flexible of the two series. It is designed for shaped surfaces and radii and is ideal for producing a perfect finish thanks to its wider grit range.

- Long product life
- High stock removal rates with less pressure
- Fewer belt changes
- Shorter treatment time
- Excellent and consistent finish over a long period of time
- Fewer individual operations

Product profile

Grit type:	Aluminium oxide
Grit range:	400; 800-1200
Backing:	JJ-wt cloth
Coating:	Structured
Bonding:	Resin over resin
Special coating:	Cooling additive

Use

Applications
- Surface treatment
- Structuring and final sanding
- Stock removal
- Removal of discolouration

Materials
High-alloy steels; Unalloyed / low-alloy steel; Non-ferrous metal

Technology
siasphere
