

# 6240 siamet SCM

The flexible 6240 siamet SCM offers high edge stability

## The flexible 6240 siamet SCM offers high edge stability

The 6240 siamet SCM has been especially developed for sanding application where edge stability and flexibility are very important.

- ▶ Consistent surface finishes even on curved workpieces
- ▶ High level of flexibility
- ▶ High edge stability, high initial tearing resistance
- ▶ Long lifetime

### Product profile

Grit type:	Aluminium oxide / blue-fired
Backing:	Nonwoven
Coating:	Mechanical
Bonding:	Resin over resin

### Use

### Applications

- Finishing to prepare for coating and electroplating
- Deburring
- Removal of discolouration
- Smoothing and blending of flaws
- Structuring and final sanding
- Surface treatment

### Materials

Unalloyed / low-alloy steel; High-alloy steels; Non-ferrous metal; Aluminium

### Technology

SCM belts; X-LOCK
